1. Create a simple String calculator with a method **int Add(string numbers)**
 1. The method can take 0, 1 or 2 numbers, and will return their sum (for an empty string it will return 0) for example "" or "1" or "1,2"
 2. Start with the simplest test case of an empty string and move to 1 and two numbers
 3. Remember to solve things as

EncodingFilter para MovilReport Fijar este filtro en web.xml para MovilReport <filter> <filter-name>encoding-filter</filter-name> <filter-class> org.opensymphony.xwork2.filter.EncodingFilter </filter-class>	Kata: String Calculator http://osherove.com/tdd-kata-1/ String Calculator Create a simple String calculator with a method int Add(string numbers). The	Pruebas curs TDD con Carl Mayúsculas y minúsculas se equivalente (C = casa). Las tilde no afectan (camión = carrón). La ñ es igual a (leña = leña).
